Have a look at the powerful features provided by 4WS.Plaform

[Take a Tour](#)

Easy to use

Programmers are no more needed to develop applications; required skills are in most cases related to the SQL language and

Fast

Time-to-market is significantly reduced, since no coding task is required; all you need is to graphically configure your application,

Multi-database and portable

4WS.Platform is based on Java, so it can be executed in any operating system where Java 6 is available. Moreover, it has been

Restful web services

All the business logic can be easily accessed not only by the web tier but from any other system: this really makes your applications
